

## Product Description

HBIR29/TK is a Bluetooth PIR standalone motion sensors for the track system, with 3-phase dial and one DALI channel output (80mA DALI power supply built in). HBIR29/TK also design with a metal surface box and the installation only requires simple insertion into the track, it is ideal for both commercial and domestic downlight lighting. With Bluetooth wireless mesh networking, it makes communication between luminaires much easier without time-consuming hardwiring, which eventually saves costs for projects (especially for retrofit upgrade projects!). All simple device setup and commissioning can be done via **Koolmesh™** app.

## Detection Pattern & Optional Accessory

The data below is tested under following conditions:

- Single person walking;
- Sensor not connected to any driver that may have soft-on period;
- Testing temperature  $T_a = 20^\circ\text{C}$ ;
- The testing is conducted in an open and spacious indoor field, without noticeable obstacles or influences that may affect PIR performances.

## Placement Guide and Typical Range

### Smart Phone to Device Range

The smart device with the App installed will have a typical range of 10m, but varies from device to device. During commissioning, the installer will need to be in range of the devices when searching for devices to add to the network.

Once the devices have been added to the network via the App, the devices will start communicating within the wireless mesh. This means that once the network is complete, all devices are accessible from the smart device when in a 20m range of a single point.

### Optional Accessory --- Blind Insert for Blocking Certain Detection Angles
