

Product Description

HED7030/BT is a Bluetooth dimmable LED driver, with maximum power output of 30W. It come with Switch-Dim interface by using Push switch (retractive switch) and of course Bluetooth dimming interface. The driver comes with an RJ12 terminal, ready to plug in a wide selection of motion sensors, ranging from HF to PIR, from low bay to high bay etc. It is ideal for direct projects or new luminaires design for lighting manufacturers. With Bluetooth wireless mesh networking, it makes communication between luminaires much easier without time-consuming hardwiring, which eventually saves costs for projects. Meanwhile, simple device setup and commissioning can be done via **Koolmesh™** app.

Mechanical Structure & Dimensions

Wire Preparation

To make or release the wire from the terminal, use a screwdriver to push down the button.

Wiring Diagram

Note: There is no need for any hardwirings on "push" terminal between one driver to another. The installer only needs to connect the push switches to the nearest driver to save labor and cost. The push switches can be assigned to control any Bluetooth driver through the app commissioning.

The data above is calculated according to the formula: $\text{Maximum Amount} = 16 / (P_n / 230)$. In order to provide a more reliable reference in real application, the data have been revised to take 60% of the number calculated, i.e. $16 / (P_n / 230) \times 60\%$. Please kindly take note that the calculation is based on ABB circuit breaker series S200. Actual values may differ due to different types of circuit breaker used and installation environment.
