Installation Process

Detailed Installation Instructions

Method A. Installation steps with HBKS01, HBKS02, HBKS03

1. Use both hands to lift the cover upward and remove it from the base.
2. Select the appropriate mounting method:
a: For wall mounting:
a1: Use Ø4.0×20mm screws to mount the HAKS02 onto the wall.
a2: Use Ø4.0×30mm screws to fix the aligned switch rear panel onto the HAKS02.
b. For switch box mounting:
Use Ø4.0×30mm screws to fix the aligned switch and HAKS02 onto the switch box.
3. Snap the cover back onto the base to complete the installation.

Method B. Installation steps with HBKS01D, HBKS02D

1. Use a prying tool or screwdriver to carefully lift and open the switch bezel.
2. Select the appropriate mounting method:
a. For wall mounting:
Use Ø4.0×20mm screws to fix HAKS02 onto the wall.
b. For switch box mounting:
Use Ø4.0×30mm screws to fix HAKS02 onto the switch box.
3. Attach the switch backplate to the installed HAKS02 and secure it properly.
4. Snap the cover back onto the base to complete the installation.

Commissioning Instructions and Precautions

Notes for Method B

1. Please control the screw tightening torque during assembly (recommended 0.1 N·m) to avoid panel deformation caused by uneven stress, which may affect button feel or function. Proper torque ensures both structural stability and appearance quality.
2. Remove the switch when the installation is completed: At the accessory groove, use a pry tool or a Ø3mm screwdriver to gently lift and remove the border. This will expose the two screw holes from installation step 3, enabling future disassembly or replacement.

Warning: For additional important documents, including installation precautions, product guidelines, and guarantee conditions, please refer to the official downloads.
