

Multi-Directional HF Sensor

HMW28/AA

On/Off Control

HYTRONIK®

Product Description

HMW28/AA is a HF standalone motion sensor, with on/off relay control. It is designed with a metal surface mount box and the detection angle is adjustable by needs. HMW28/AA is ideal for typical indoor applications such as offices, classrooms, healthcare, and other commercial areas (corridors and warehouses).

Features

- On/Off control with relay output
- Store settings in the remote for easy commissioning when programming multiple sensors.
- 1 Push inputs for flexible manual control
- Black & White & Gray metal surface mount box option
- User-friendly design for installation
- 5-year warranty

Technical Specifications

Input & Output Characteristics	
Operating voltage	220~240VAC 50/60Hz
Stand-by power	<0.8W
Load ratings	400VA(capacitive) 800W(resistive)
Max withstandable in-rush current	120A@160µs

* The Max withstandable in-rush current tested under 50% Ipeak / 230Vac

Sensor Data	
Sensor Principle	High Frequency (microwave)
Ceiling-mounted Detection Range	Installation Height : 3m Max. Detection Range (Ø) : 13m * Sensor head angle set to 70°
Wall-mounted Detection Range	Installation Height : 2.5m Max. Detection Range (Ø) : 22m
Detection angle	360°

* For more details of detection range, please refer to "detection pattern" section.

Environment	
Operation temperature	Ta: -20°C ~ +55°C
Storage temperature	-35°C ~ +55°C
Relative humidity	20~90%
IP rating	IP20

Safety & EMC	
EMC standard (EMC)	EN55015, EN61000-3-2/-3-3, EN61547
Safety standard (LVD)	EN60669-1, EN60669-2-1
Certification	CE, UKCA, RCM

Mechanical Structure & Dimensions

Wiring Diagram

Detection Pattern

*Sensitivity set to maximum

Ceiling-mounted application

Installation height: 3m

*Sensor head angle set to 70°

Installation height: 3m

*Sensor head angle set to 90°

Wall-mounted application

The installation data conduct by following testing conditions:

1. Environmental humidity: 80.5%;
2. Single person walking;
3. Sensor not connected to any driver that may have soft-on period;
4. Testing temperature $T_a = 31.5^{\circ}\text{C}$;

Application	Angle	Height	Sensitivity			
			100%	75%	50%	10%
Ceiling-mounted	90 °	3m	10m	8m	6m	4m
		8m	14m	5m	none	none
	70°	3m	13m	14m	12m	10m
		8m	15m	7m	4m	none
Wall-mounted	90 °	2.5m	22m	20m	16m	11m

Note: The unit of 90 degree detection data is diameter.

Ceiling-mounted application

Wall-mounted application

Functions and Features

1 On/Off Control

These sensors provide simple switching of the light based upon occupancy. A daylight sensor is also built-in to prevent the light switching on when there is sufficient natural light.

With sufficient natural light, the light does not switch on when presence detected.

With insufficient natural light, the sensor switches on the light automatically when person enters the room.

The sensor switches off the light automatically after the hold-time when there is no motion detected.

2 Robust HF Sensors Design – Anti-interference Technology

Hytronik's microwave motion sensor uses 5.8GHz high frequency (HF) antenna in the product design. With the increasing density of wireless environments such as 5G GSM tower and 5G Wi-Fi coverage, this has created extra challenges for sensor's operation because the air is shared by all kinds of wireless signals, and transmissions from any device at the similar frequency could potentially cause interference. The effects of interference which can be noticed by users are usually false triggering of sensors (turning on/off erratically), or lights staying on even after hold time etc.

To get around such tough environment, Hytronik has developed a new series of robust HF modules, designed to be loaded with our own special sophisticated software algorithms. These robust HF modules can withstand different types of wireless interferences in the real application. We believe this is the ultimate solution towards demanding installation environments in the future.

Settings (Remote Control HRC-12)

ON / OFF

Permanent ON/OFF function

Press button "ON/OFF" to select permanent ON or permanent OFF mode.

* Press button "AUTO", "RESET" or "Ambient" to quit this mode.

The mode will change to AUTO Mode after power failure.

RESET

Reset Settings

Press button "RESET", all settings go back to default values as below:

Detection range: 100%; Hold-time: 5min; Lux disabled

AUTO

Sensor mode

Press "Auto Mode" button, the sensor starts to function and all settings remain the same as the latest status before the light is switched on/off.

SEMI AUTO

SEMI-AUTO mode

Press "SEMI-AUTO" button, to enter semi-auto mode. The fixture is manually on by push-switch and automatically off in this mode.

HRC-12

Detection range

Press buttons in zone "HF sensor Detection range" to set detection range at 100% / 75% / 50% / 10%.

Daylight threshold

Press buttons in zone "Daylight threshold" to set daylight sensor at 2Lux / 10Lux / 50Lux / 100Lux / 300Lux / 500Lux / Disable.

Ambient daylight threshold

Press button "Ambient", the surrounding lux level is sampled and set as the new daylight threshold.

Hold-time

Press buttons in zone "hold-time" to set the hold-time at 5sec / 1min / 5min / 10min / 15min / 30min / 60min.

Note: 5sec is test mode.

Dimming Interface Operation Notes

Switch-Dim

The provided Switch-Dim interface allows for a simple dimming method using commercially available non-latching (momentary) wall switches.

Switch Function	Action	Descriptions
Push switch	Short press (<1 second) * Short press has to be longer than 0.1 s, or it will be invalid.	- Turn on/off - Turn on only - Turn off only - Quit manual mode - Do nothing
	Long press (≥1 second)
