#### IP65 PIR Zhaga book 18 Standard Motion Sensor with Bluetooth 5.0 SIG Mesh

### HIR15/BLE

DALI-2 Output & Tunable white

### Product Description

HIR15/BLE is a Bluetooth dimming and tunable white PIR motion sensor. It is compatible with the Zhaga book 18 standard and designed with DALI-2 output and a robust IP65 structure, the capability can be up to 12m installation height, which is ideal for the typical outdoor lamp (such as a streetlight). HIR15/BLE is embedded with a Bluetooth module to achieve dimming control and colour tuning. The Bluetooth wireless mesh networking makes communication much easier without any hardwiring, which eventually adds value to luminaires and saves costs for projects. Meanwhile, simple device setup and commissioning can be done via **Koalmesh**\*app.

### App Features

G Quick setup mode & advanced setup mode

Tri-level control

Daylight harvest

Circadian rhythm (Human centric lighting)

Floorplan feature to simplify project planning

Web app/platform for dedicated project management

Koolmesh Pro iPad version for on-site configuration

Grouping luminaires via mesh network

Scenes

Detailed motion sensor settings

Dusk/Dawn photocell (Twilight function)

Push switch configuration

Schedule to run scenes based on time and date

Astro timer (sunrise and sunset)

F Staircase function (primary & secondary)

Internet-of-Things (IoT) featured

Device firmware update over-the-air (OTA)

Device social relations check

**■** Bulk commissioning (copy and paste settings)

Dynamic daylight harvest auto-adaptation

Power-on status (memory against power loss)

⋄ Offline commissioning

P Different permission levels via authority management

Network sharing via QR code or keycode

Remote control via gateway support HBGW01

 $\{\mathring{\mathbb{G}}\}$  Interoperability with Hytronik Bluetooth product portfolio

Compatible with EnOcean BLE switches

Continuous development in progress...

#### Hardware Features

Input device (Type D)

Zhaga Book 18 standard

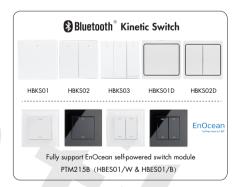

== 15mA DALI-2 Broadcast output

Tunable white

IP 1P65 design

High-bay (up to 12m height)

5-year warranty

# **Technical Specifications**

Bluetooth Transceiver	
Operation frequency	2.4 GHz - 2.483 GHz
Transmission power	4 dBm
Range (Typical indoor)	10~30m
Protocol	<b>₿Bluetooth</b> ® 5.0 SIG Mesh

Input & Output Characteristics				
Operating voltage	24 VDC			
Stand-by power	<0.5W			
Output*	l guaranteed: 10mA 1 max: 15mA U rated: 16VDC			
Lux Range	0~1000 lux			
*TI				

<sup>\*</sup>The output default settings is off. If it needs to be turned on, please set it manually after connecting the APP.

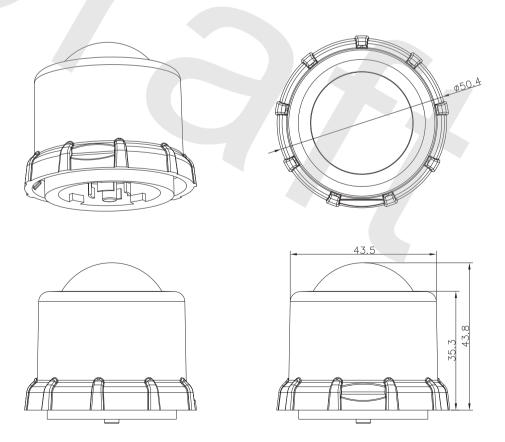

Environment		
Operation temperature	Ta: -20°C ~ +50°C	
Storage temperature	-30°C ~ +70°C	
Relative humidity	10 ~ 90%	
IP rating	IP65	
Insulation	Class II	

Sensor Data	
Sensor principle	PIR
Detection range*	Max installation height: 12m Max diameter: 20m
Detection angle	360°

<sup>\*</sup> The detection range is heavily influenced by sensor placement (angle) and different walking paces. It may be reduced under certain conditions.

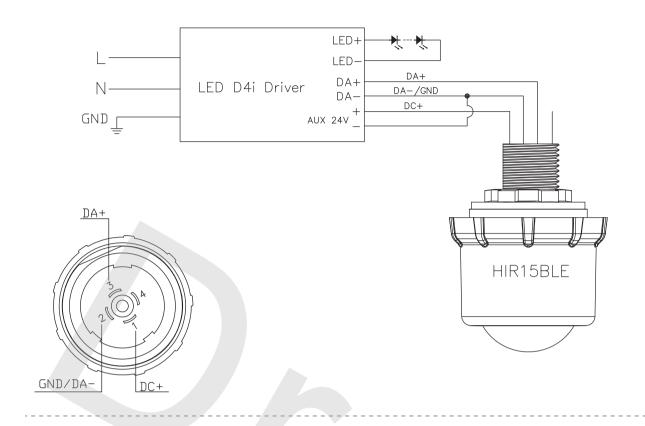

Safety & EMC			
EMC standard (EMC)	en61547, en55015		
Safety standard (LVD)	EN61347-1 EN61347-2-11		
RED	EN300328, EN301489-1/-17EN50663		
Certification	CE , UKCA

## Wiring Diagram 1

# Wiring Diagram 2

#### Note:

- $1. \ During \ wiring, \ it \ is \ imperative \ to \ ensure \ that \ the \ DALI \ bus \ current \ does \ not \ exceed \ 250mA.$
- 2. Multiple master devices should not be connected in parallel.
- 3. When utilizing a single HIR15/BLE, refrain from connecting more than 3 D4i drivers to prevent potential equipment damage due to exceeding the DALI bus current.

#### **Detection Range**

The data below is tested under following conditions:

- Single person walking;
- Sensor not connected to any driver that may have soft-on period;
- The testing is conducted in an open and spacious indoor field, without
- noticeable obstacles or influences that may affect PIR performances.

A: Tangential movement  B: Radial movement  h = max.12m  h = max.12m  insensitive sensitive sensitive sensitive	Mount height	Tangential Movement (A)	Radial Movement (B)
	3m	$\max 50\text{m}^2(\varnothing = 8\text{m})$	$\max 13m^2(\varnothing = 4m)$
	5m	max 79m² (Ø = 10m)	$\max 13m^2 (\varnothing = 4m)$
	8m	max 154m² (Ø = 14m)	$\max 13m^2(\varnothing = 4m)$
	12m	max 314m² (∅ = 20m)	$\max 13m^2 (\varnothing = 4m)$

#### Placement Guide and Typical Range

Smart Phone to Device Range

The smart device with the App installed will have a typical range of 10m, but varies from device to device. During commissioning, the installer will need to be in range of the devices when searching for devices to add to the network.

Once the devices have been added to the network via the App, the devices will start communicating within the wireless mesh. This means that once the network is complete, all devices are accessible from the smart device when in a 20m range of a single point.
