

Product Description

HIR28/2CH is a flush mount PIR motion sensor, On/Off control with two independent relay channel outputs. It has two relays built-in: one is voltage-free contact, which is NO (normally open contact) and NC (normally closed contact) 2-in-1, the other is normally closed relay output. It is ideal for typical indoor applications such as office, classroom, healthcare and other commercial areas.

With on/off relay control

Designed with a low profile for aesthetically demanding architectural projects providing a high quality sensor for simple on/off occupancy control or providing semi-automatic (absence detection) control.

An intelligent photocell is also included to prevent switching of the lights when natural daylight is available

Set-up of the sensor is carried out using a remote control handset with program memory allowing one-key commissioning where common settings are used for multiple devices.

Features

- Store settings in the remote for easy commissioning when programming multiple sensors
- On/Off control with relay output
- Freely select NO or NC contact

VFC: Volt-free Contact/Dry Contact

- 24VDC@2A
- 250VDC@2A
- 🖽 Two relays built-in
- Zero crossing detection to reduce in-rush current and maximise relay life
- Max withstandable in-rush current: 120A@160µs
- 2 Push inputs for flexible manual control
- P Black & White & Gray metal surface mount box options
- www. Various PIR lens and blind inserts options
- 🗶 User-friendly design for installation
- High bay version available (up to 21m in height)
- 5 -year warranty

HIR28/2CH/H

HIR28/2CH/UH

Technical Data

Input Characteristics			
Mains voltage	220~240VAC 50/60Hz		
Stand-by power	<1W		
Load ratings:	Channel 1: 400VA Channel 2: 24VDC@2A,250VAC@2A		
Max withstandable in-rush current	80A@160µs		
Warming-up	20s		

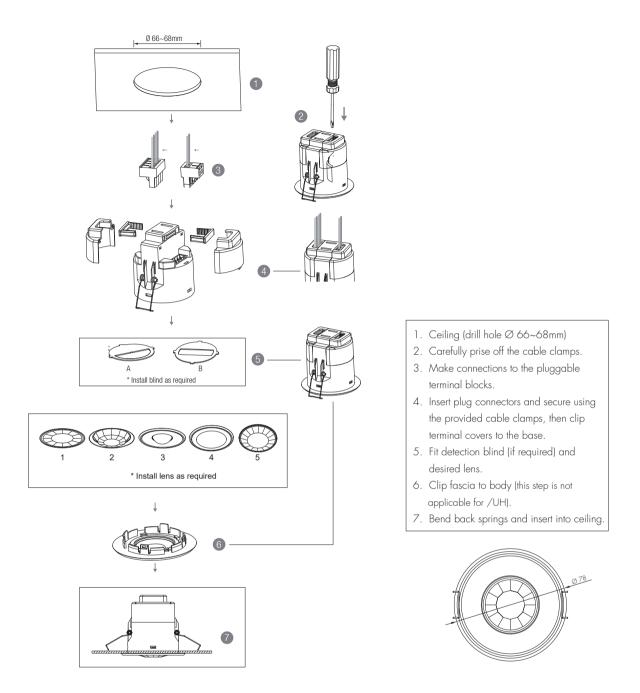

Safety and EMC	
EMC standard (EMC)	EN55015, EN61000
Safety standard (LVD)	EN60669-1, EN60669-2-1
Certification	CB, CE, EMC, LVD, RCM

Sensor Data			
Sensor Model	PIR detection		
Detection range (Max.)* HIR28/2CH	Installation Height : 6m Detection Range(Ø) :9m		
Detection range (Max.)* HIR28/2CH/R	Installation Height : 6m Detection Range(Ø) : 10m		
Detection range (Max.)* HIR28/2CH/H	Installation height: 15m (forklift) 12m (person) Detection range (Ø): 24m		
Detection range (Max.)* HIR28/2CH/UH	Installation height: 21m Detection range (Ø): 28m		
Detection angle	360°		

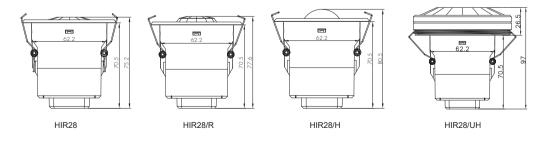

* For more details of detection range, please refer to "detection pattern" section.

Environment	
Operation temperature	Ta: -20°C ~ +50°C
IP rating	IP20

Mechanical Structure

Note:We recommend the mounting distance between sensor to sensor should be more than 2m to prevent sensors from false-triggering.

Wire Preparation

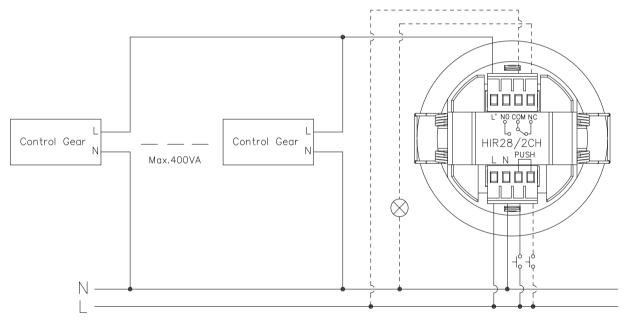

С).75 - 2.5	m	ım [□]
Γ			
	8mm		

(min 6mm, max 11mm)

Pluggable screw terminal. It is recommended to make connections to the terminal before fitting to the sensor.

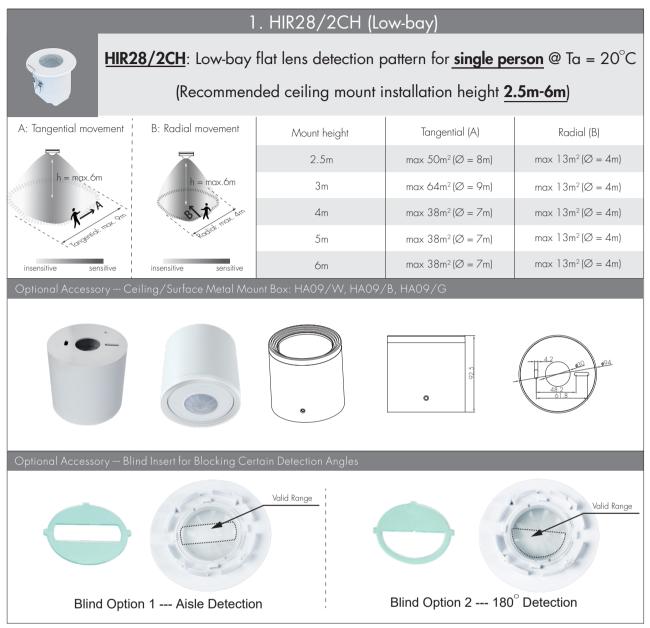

Wiring Diagram

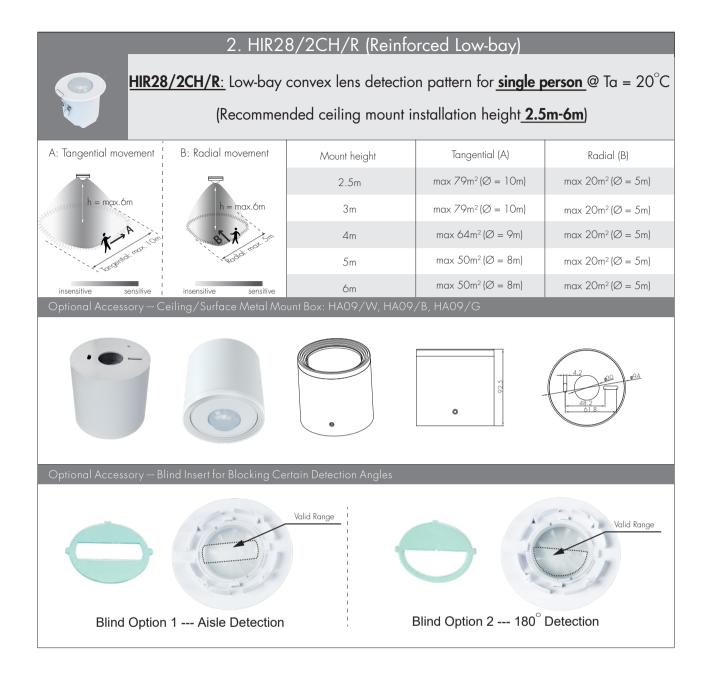

*By connecting L and COM, the VFC (voltage-free contact) channel can also be turned into a common Switch L output to achieve separate control of the two Switch L channels.

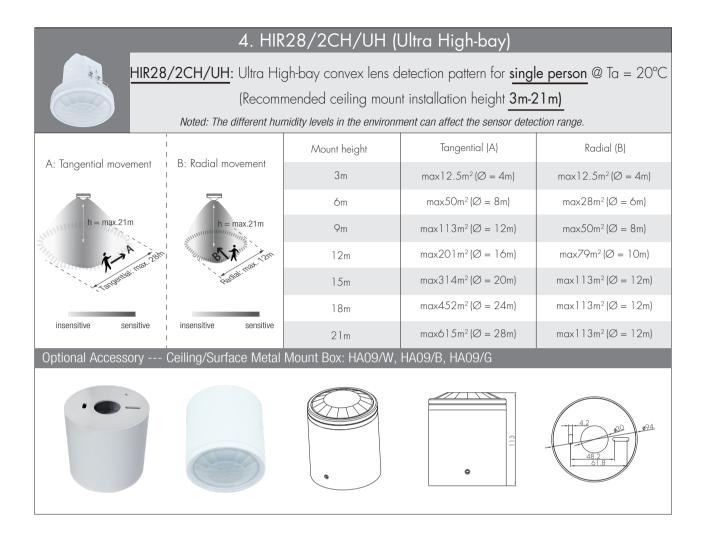

Detection Pattern & Optional Accessories

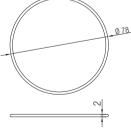

Subject to change without notice.

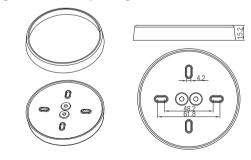

Optional Accessories For Water-Proof

*Big and small silicon gasket used to make IP54 degree protection (mounted into HAO9 housing for ceiling mount)

Big silicon water-proof gasket dimension(size:mm)

Noted: HIR28/2CH/UH is only suitable for small silicon water-proof gasket

Functions and Features

] On/ off Control

This sensor is a motion switch, which turns on the light upon detection of motion, and turns off after a pre-selected hold-time when there is no movement. A daylight sensor is also built in to prevent the light from switching on when there is sufficient natural light.

2 Intelligent Photocell (daylight detection prior to motion detection)

The built-in photocell will also automatically turn off the light when the ambient natural light exceeds the programmed lux level for more than 5min, regardless of whether motion is detected or not.

With sufficient natural light, the light does not switch on when presence is detected.

With insufficient natural light, the sensor switches on the light automatically when presence is detected.

The sensor switches off the light when natural light is sufficient, even with presence.

3 Manual Override

With the help of push-switch, this sensor can be over-ridden by the end-user to manually switch on/off the light, which makes the product more user-friendly and offers more options to fit some extra-ordinary demands:

- * Short Push (<1s): on/off function;
- On → Off: the light turns off immediately and cannot be triggered ON by motion until the expiration of pre-set hold-time. After this period, the sensor goes back to normal sensor mode.
- Off → On: the light turns on and goes to sensor mode, no matter if ambient Lux level exceeds the daylight threshold or not.

Note: if end-user do not want this manual override function, just leave the "push" terminal unconnected to any wire.

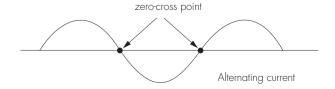

4 Semi-auto Mode (Absence Detection)

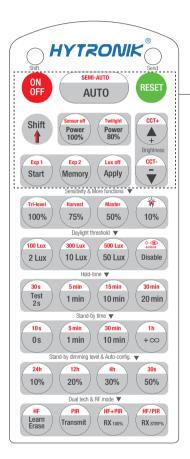

It is easy to forget to switch off the light, in office, corridor, even at home. And in many other cases, people do not want to have a sensor to switch on the light automatically, for example, when people just quickly pass-by, there is no need to have the light on. The solution is to apply this "absence detector": motion sensor is employed, but only activated on the manual press of the push-switch, the light keeps being ON in the presence, and switches off in the long absence.

Note: end-user can choose either function 3 or function 4 for application. Default function is manual override.

5 Zero-cross Relay Operation

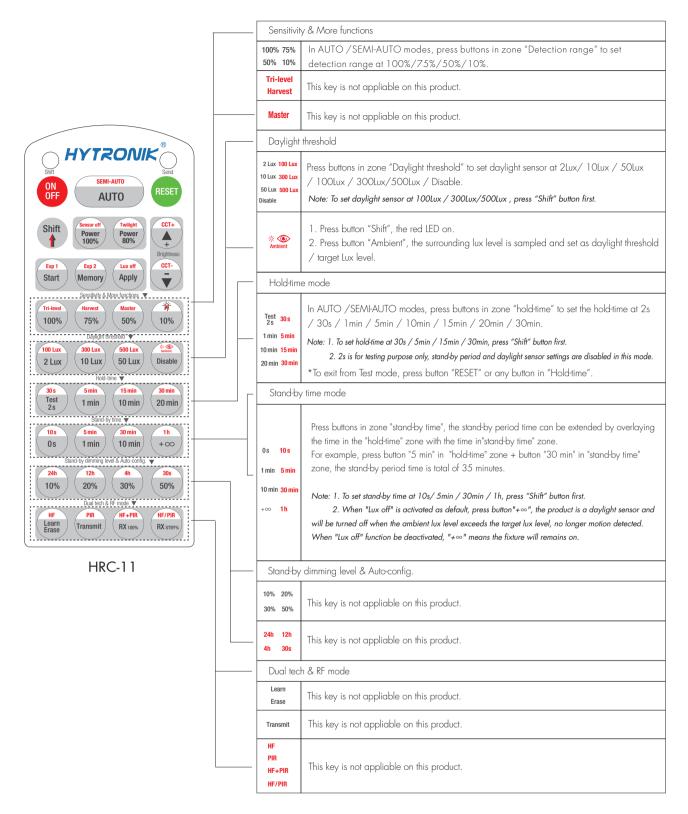

Designed in the software, sensor switches on/off the load right at the zero-cross point, to ensure that the in-rush current is minimised, enabling the maximum lifetime of the relay.

HRC-11

ON OFF	Press button "ON/OFF" to select permanent ON or permanent OFF mode. * Press button "AUTO"/ "RESET" to exit this mode.
RESET	Press button "RESET", all settings go back to default. The default settings are: Auton mode; Detection range 100%; Hold-time 5min; Daylight threshold disable; Lux off activated;
Shift	Press button "Shift", the LED on the top left corner is on to indicate mode selection. All values / settings in RED are valid for 20 seconds.
AUTO	Press button "AUTO" to initiate automatic mode. The sensor starts working and all settings remain as before the light is switched ON/OFF;
SEMI-AUTO	 Press button "Shift", the red LED on. Press button "SEMI-AUTO" to initiate Semi-auto mode. The sensor is only activated with the manual press of push switch. To exit this mode, simply press button "AUTO". For Sensor LED indicator references: Remains on 2s, initiate "Semi-auto" mode from "Auto" mode.
Power 100% 80%	This key is not appliable on this product.
Sensor off Twilight	This key is not appliable on this product.
	This key is not appliable on this product.
CCT+ CCT-	This key is not appliable on this product.
Start Memory Apply	 Press button "Start" to program. Select the buttons in "Detection range", "Daylight threshold", "Hold-time", "Stand-by time", to set all parameters. Press button "Memory" to save all the settings programmed in the remote control. Press button "Apply" to set the settings to each sensor unit[s]. For example, to set detection range 100%, daylight threshold Disable, hold-time 5min, stand-by time +∞, the steps should be: Press button "Start", button "100%", "Disable", "Shift", "5min", "Shift", "+∞", "Memory". By pointing to the sensor unit[s] and pressing "Apply", all settings are passed on the sensor(s).
Lux off	The "Lux off" function is activated as default. When the ambient lux level exceeds the target level continuously for more than 5 minutes, the lights will be turned off. In AUTO /SEMI-AUTO/Twilight modes, to disable "Lux off": 1. Press "Shift" button first, the red LED on. 2. Press "Lux off" button, the "Lux Off" function will be deactivated. The lights will not turn off even when the ambient lux level exceeds the target lux level but will dim down the brightness to the stand-by time level. For Sensor LED indicator references: 1.Fast flash 1s, "Lux off" function activated. 2.Remains on 2s, "Lux off" function deactivated.
Exp 1 Exp 2	"Exp" refer to Expansion, these two buttons are reserved functions and pending future development.
